

Hi I'm Andrea Perkins and I am the cosmetology teacher at TST BOCES Career & Tech Center in this class. Cosmetology, you're going to learn many new things, you're going to prepare for the New York State Licensing as I'm passing the state, it's a two-year program. The first year we work on mannequins, we work on each other, you're going to learn the basics of Hair Care, Nail Care & Skin Care, you're going to do a lot of cutting and rolling in curling, lots of mannequin work, and then in the second year we also go into the mannequin work but we do more clinical, so here we're going to work on each other, you're going to work on fellow students, are going to work on the public, we have a Clinic every Thursday and Friday in the morning from 8:30 to 10, so you can bring your family and friends, you're also going to continue to work on your state boards, which would include more in-depth Skin Care, Now Care, and Hands-On hair care, as you go along in your career, after you pass your boards, then you're going to work in a salon, from there it could be a large Salon, you could work at a tanning salon, you could work it on a small scale Salon, in the family owned or your own, even you could even open your own business, others, many, many jobs in this field, some of them that you would be licensed to do include skin care, that would be your waxing, your makeup, we are Aesthetics, you could also go into nails, to do manicures, pedicures, acrylic nails, artificial nails, or I could just work on here, which would include hair color, hair foiling, hair highlighting, you could also become a male and female haircuts, you can also do curling, all sorts of different avenues for hair care.
